

## **Ang Salita Ng Diyos Liturgical Site: Test Case**

### **1 INTRODUCTION**

#### **1.1 PURPOSE OF THE TEST CASE DOCUMENT**

The Test Case document documents the functional requirements of the ALS Calendar test case. The intended audience is the project manager, project team, testing team, project mentors, project advisers and external Quality Assurance Team. Some portions of this document may on occasion be shared with the client/user and other stakeholder whose input/approval into the testing process is needed.

#### **2 TEST CASE DOCUMENT SPECIFICATION**

This test case was accomplished to duly assess the functionality and overall quality of the ALS Calendar tool. This test case's construction satisfies a requirement during the proponent's Quality Assurance Phase. In line with this requirement, the proponents

##### **2.1 SCOPE**

The cases discussed in this plan, involves a verification of the features defined in the Software Quality Assurance Plan, from the legitimacy of the events being displayed in the calendar, to the various capabilities that users and administrators may perform.

##### **2.2 REFERENCES**

- For a more general introduction to the various definitions, acronyms and abbreviations involved in this study, reader/evaluator may visit the Software Quality Assurance Plan (SQAP).

However, some details are also included in the Glossary of this test case.

- Software Requirements: ALS SQAP – Software Project Management Plan
- Database Design and Management: ALS SQAP – Requirements and Design Documents
- Testing Requirements (Introduction, Assumptions, Test Features, Approaches, Needs, Contingencies, etc.): ALS SQAP - Test Plan

##### **2.3 OVERVIEW OF TEST CASE DOCUMENT**

This test case document discusses the flow of events that would be expected in normal conditions as well as any potential alternate flow of events, and exceptions/errors that may be expected during the usage of the system.

To see full documentation visit: GIT > DOCUMENTATION > QUALITY > TEST CASE.DOC

To see document version, visit same page > ALS - Test Case Document

**Ang Salita Ng Diyos Liturgical Site**  
**3.1 FUNCTIONAL TEST CASES FOR USE CASE: USER**  
**REGISTRATION AND LOGIN SECURITY**

Test Case validates the following:

- User is registered with a viable **username** and **password** of his/her choice
- Username and password **works effectively**

**Test Instructions:**  
Perform the instructions in the Input column, given the existing pre-conditions. Derive the verdict (in dropdown format), based on the Expected Output in contrast with the Observed Output.

Legend	
100%	Pass
0%	Fail
0%	Not Run

TC Number	TC Name	Reference	Pre-conditions	Input	Expected Output	Observed Output	Verdict	Remarks
3.1.1	User Site Access	Login	• User can access site's Main page.	User must enter link in browser's searchbar	System displays the <b>main page</b> .		Pass	
3.1.2	User Site Registration	Register	• User can access site's Main page.	User must click the Signup link	System displays the <b>Register page</b> .		Pass	
3.1.2.1			• User can access site's Signup page.	User must enter their first name	System accepts <b>user's first name</b>		Pass	
3.1.2.2				User must enter their last name	System accepts <b>user's last name</b>		Pass	
3.1.2.3				User must enter their username	System accepts <b>alphanumeric username</b>		Pass	
3.1.2.4				User must enter their email	System accepts <b>users' email</b>		pass	
3.1.2.5				User must enter their password	System accepts <b>users' password</b>		Pass	

3.1.2.6				User must verify the content of their textfields and then click Signup	System must accept user entries, and redirect user to the main site, logged in.		Pass	
3.1.3	User Site Login	Login	• User can access site's Main page.	User must click the Login link	System displays the <b>Login page</b> .		Pass	
3.1.4	User Site Login	Login	• User can access site's Main page.	User must click the Logout link	System displays the <b>Main page</b> .		Pass	
3.1.3.1			• User can access site's Login page.	User must enter their username	System accepts <b>alphanumeric username</b>		Pass	
3.1.3.2				User must enter their password	System accepts <b>users' password</b>		Pass	
3.1.3.3				User must be able to click the Remember me checkbox	Checkbox must be verified as 'ticked' or 'unticked'		Pass	
3.1.3.4				User must verify the content of their textfields and then click Login	System must accept user entries, and redirect the <b>Home page</b>		Pass

### 3.2 FUNCTIONAL TEST CASES FOR USE CASE: EVENT DISPLAY CORRECTNESS

Test Case validates the following:

- The events being displayed are in line with the client's requirements
- The events being displayed are identical to the data presently stored in the database

### Test Instructions:

Perform the instructions in the Input column, given the existing pre-conditions. Derive the verdict (in dropdown format), based on the Expected Output in contrast with the Observed Output.

### Legend

100%	Pass
0%	Fail
0%	Not Run

TC Number	TC Name	Reference		Input	Expected Output	Observed Output	Verdict	Remarks
3.2.1	Calendar Display	View Calendar	• User can access the Calendar page.	User must go through the calendar	System displays the <b>calendar</b> .		Pass	Another precondition: user should be logged in.
3.2.1.1	Calendar Display Inspection	View Calendar Events/ Readings		User must be able to identify events displayed in the calendar	System displays events in the calendar		Pass	Very colorful! Good job! :)
3.2.1.2			• Testers must consider that the items in the database are directly derived from the lectionary source, if spelling is wrong, tester must note that spelling should be compared with items in database; nevertheless, it would help to note all misspelled items	User must be able to check the spelling of each displayed event in the calendar	System displays events in the calendar in the <b>correct spelling</b>		Pass	We don't have basis. We trust you guys!

3.2.2	Calendar Display Refresh		<ul style="list-style-type: none"><li>• User can access the Calendar page.</li></ul>	User must be able to see the calendar page's display	System displays the <b>calendar</b> .		Pass	
3.2.2.1				User must refresh the page	System must not add any <b>changes in the events</b> in the calendar after refresh.		Pass	
3.2.2	Calendar Display Verification		<ul style="list-style-type: none"><li>• Tester can access calendar</li><li>• Tester has access to database or sql file</li></ul>	Tester must verify events displayed from existing dates located in the database	System <b>displays events</b> located in the database		Pass	

**Ang Salita Ng Diyos Liturgical Site**  
**3.3 FUNCTIONAL TEST CASES FOR USE CASE:**  
**COMPLETENESS OF EVENTS BEING DISPLAYED (READING VIEW)**

Test Case validates the following:

- The data present in the calendar are complete and conforms to the populated data

**Test Instructions:**  
Perform the instructions in the Input column, given the existing pre-conditions. Derive the verdict (in dropdown format), based on the Expected Output in contrast with the Observed Output.

Legend	
100%	Pass
0%	Fail
0%	Not Run

TC Number	TC Name	Reference	Pre-conditions	Input	Expected Output	Observed Output	Verdict	Remarks
3.3.1	Calendar Display	View Calendar	• User can access the Calendar page.	User must go through the calendar	System displays the <b>calendar</b> .		pass	
3.3.2	Calendar Display Inspection	View Calendar Events/ Readings		User must be able to identify events displayed in the calendar	System displays events in the calendar		pass	
3.3.2.1				User must be able to check the spelling of each displayed event in the calendar	System displays events in the calendar in the <b>correct spelling</b>		pass	
3.3.3	Events Display	View Calendar Events/ Readings	• User can access the Calendar page.	User must be able to read calendar events	System displays events in the calendar		pass	
3.3.3.1				User must be able to see different readings	System displays <b>different readings</b> in a date		pass	What kind of readings? Just the verses number?

3.3.3.2				User must be able to see events in every date of the month	System displays a calendar month filled with events		pass	
3.3.4	Event Navigation	View Calendar Events/ Readings	• User can access the Calendar page.	User must be able to navigate to different months of 2015	System displays a calendar with specific month		pass	
3.3.4.1				User must be able to see different types of events	System displays a calendar with different events		pass	Good color presentation of the different events

### Ang Salita Ng Diyos Liturgical Site

#### 3.4 FUNCTIONAL TEST CASES FOR USE CASE: READABILITY OF CALENDAR EVENTS (EVENT VIEW)

#### Test Instructions:

Perform the instructions in the Input column, given the existing pre-conditions. Derive the verdict (in dropdown format), based on the Expected Output in contrast with the

Test Case validates the following:

- The events displayed in the calendar are readable and are recognizable

#### Legend

100%	Pass
0%	Fail
0%	Not Run

TC Number	TC Name	Reference	Pre-conditions	Input	Expected Output	Observed Output	Verdict	Remarks
3.4.1	Calendar Display	View Calendar	• User can access the Calendar page.	User must go through the calendar	System displays the <b>calendar</b> .		pass	
3.4.2	Calendar Display Inspection	View Calendar		User must be able to identify events displayed in the calendar	System displays events in the calendar		pass	
3.4.2.1				User must be able to check the spelling of each displayed event in the calendar	System displays events in the calendar in the <b>correct spelling</b>		pass	We have no basis to check the correct format and spelling of each events
3.4.3	Events Display	View Calendar Events/ Readings	• User can access the Calendar page.	User must be able to read calendar events	System displays events in the calendar		pass	
3.4.3.1				User must be able to see different readings	System displays different readings in a date		pass	I've noticed that there are some process that are just the same on the Reading View

3.4.3.2				User must be able to see events in every date of the month	System displays a calendar month filled with events		pass	
3.4.4	Event Style	View Calendar Events/ Readings	<ul style="list-style-type: none"> <li>User can access the Calendar page.</li> </ul>	Calendar events are readable enough	System displays events in the calendar		pass	Better if larger font size but it is fine
3.4.4.1				Font color of events is not too dark or not too light	System displays events in the calendar		pass	
3.4.4.2				Events are displayed visually aligned	System displays events in the calendar		pass	
3.4.5	Event Tooltip	View Calendar Events/ Readings	<ul style="list-style-type: none"> <li>User can access the Calendar page</li> <li>User can view each event in the calendar page</li> </ul>	Calendar events are rendered and are clickable	System displays events in the calendar		pass	
3.4.5.1				Refresh the page	Events are displayed in each cell of each day in the month		pass	
3.4.5.2				Hover the mouse within the range of the event	System displays the complete title of the event in the tool tip		pass	
3.4.5.2				Hover the mouse outside of the event	System should no longer display the tool tip that shows the event's name		pass	

3.4.6	Event Popup	View Calendar Events/ Readings	<ul style="list-style-type: none"> <li>User can access the Calendar page</li> <li>User can view each event in the calendar page</li> </ul>	Calendar events are rendered and are clickable	System displays events in the calendar		pass	Same process on the Event Tooltip, better if you could just put the same processes in one TC number and then proceed to the different type of Event View styles
3.4.6.1			<ul style="list-style-type: none"> <li>Details are subject to client data, if no details are available, it means no client information are given at the moment</li> </ul>	Click the mouse within the range of an event	The popup including the event name, and other details, should be displayed		pass	
3.4.6.2				Click the mouse <b>outside</b> of the event	The popup should no longer be displayed, and user is brought back to the original screen		pass	
3.4.6.3			<ul style="list-style-type: none"> <li>Details are subject to client data, if no details are available, it means no client information are given at the moment</li> </ul>	Click the mouse within the range of an event	The popup including the event name, and other details, should be displayed		pass	
3.4.6.4				Click the <b>x</b> button, located on the upper right screen of the popup	The popup should no longer be displayed, and user is brought back to the original screen		pass	
3.4.6.5			<ul style="list-style-type: none"> <li>Details are subject to client data, if no details are available, it means no client information are given at the moment</li> </ul>	Click the mouse within the range of an event	The popup including the event name, and other details, should be displayed		pass	

3.4.6.6				Click the <b>back</b> button , located on the lower right screen of the popup	The popup should no longer be displayed, and user is brought back to the original screen		pass	
3.4.6.7			<ul style="list-style-type: none"><li>• Details are subject to client data, if no details are available, it means no client information are given at the moment</li></ul>	Click the mouse within the range of an event	The popup including the event name, and other details, should be displayed		pass	
3.4.6.8				Click the back <b>Get Link</b> , located on the lower right screen of the popup	The popup should no longer be displayed, and user is brought back to the original screen		pass	

**Ang Salita Ng Diyos Liturgical Site**

**3.5 FUNCTIONAL TEST CASES FOR USE CASE: USABILITY  
OF CALENDAR (EVENT PLOTTING)**

Test Case validates the following:

- The Event Plotting of all movable feasts and the completeness of all the readings per month

**Test Instructions:**

Perform the instructions in the Input column, given the existing pre-conditions. Derive the verdict (in dropdown format), based on the Expected Output in contrast with the Observed Output.

Legend	
100%	Pass
0%	Fail
0%	Not Run

TC Number	TC Name	Reference	Pre-conditions	Input	Expected Output	Observed Output	Verdict	Remarks
3.5.1	Movable Feasts	View Calendar Events/ Readings	Dates of the Feasts vary each year				pass	
3.5.1.1	Pentecost Sunday		Display Calendar	User must navigate Calendar to the Month where Pentecost Sunday will fall	System will show the corresponding readings for Pentecost Sunday		pass	Please identify which specific month where Pentecost Sunday will fall
3.5.1.2	Easter Sunday		Display Calendar	User must navigate Calendar to the Month where Pentecost Sunday will fall	System will show the corresponding readings for Easter Sunday		pass	Please identify which specific month where Easter Sunday will fall

3.5.1.3	Ash Wednesday		Display Calendar	User must navigate Calendar to the Month where Pentecost Sunday will fall	System will show the corresponding readings for Ash Wednesday		pass	Please identify which specific month where Ash Wednesday will fall
3.5.1.4	First Sunday of Advent		Display Calendar	User must navigate Calendar to the Month where Pentecost Sunday will fall	System will show the corresponding readings for First Sunday of Advent		pass	Please identify which specific month where the First Sunday of Advent will fall
3.5.2	Completeness of Readings Each Month	View Calendar Events/ Readings	Display Calendar	User must navigate the Calendar each Month	System will show the corresponding readings for Every Month with no blanks for each day of the month		pass	

### Ang Salita Ng Diyos Liturgical Site

#### 3.6 FUNCTIONAL TEST CASES FOR USE CASE: DYNAMISM OF ADMINISTRATOR AND USER PRIVILEGES (CRUD)

Test Case validates the following:

- Administrator privileges are well-defined
- CRUD performs required functionality

#### Test Instructions:

Perform the instructions in the Input column, given the existing pre-conditions. Derive the verdict (in dropdown format), based on the Expected Output in contrast with the Observed Output.

#### Legend

100%	Pass
0%	Fail
0%	Not Run

TC Number	TC Name	Reference	Pre-conditions	Input	Expected Output	Observed Output	Verdict	Remarks
3.6.1	Create Event Determinant	Create Events	Display Event determinant form	User must click the "Create Event Determinant" button on the upper-left hand corner of the page	System will re-direct user to Event determinant create page		Pass	How to go to Event Determinant form?
3.6.1.2			Users must be in the Create page of the event determinant	User must enter the year given that that year is not in the current record	System accepts inputted year		Pass	Should specified the possible year to input
3.6.1.3				User must enter the correct Sunday cycle of the year	System accepts Inputted Sunday cycle		Pass	Should specified a correct format of each field; give examples on what to input

3.6.1.4				User must enter correct Weekday cycle of year	System accepts Inputed Weekday cycle		Pass	Should specified a correct format of each field; give examples on what to input
3.6.1.5				User must enter correct week number of Ordinary time before lent of that year	System accepts inputed week number		Pass	Please give examples of specific week number to input
3.6.1.6				User must enter date when Ash Wednesday falls for that year	System accepts inputed date for Ash Wednesday		Pass	Please give examples of specific Date to input
3.6.1.7				User must enter date when Easter Sunday will fall for that year	System accepts inputed date for Easter Sunday		Pass	Please give examples of specific Date to input
3.6.1.8				User must enter date when Pentecost Sunday will fall for that year	System accepts inputed date for Pentecost Sunday		Pass	Please give examples of specific Date to input
3.6.1.9				User must enter correct number of week of ordinary time after Pentecost Sunday	System accepts inputed Week number of Ordinary Time after Pentecost Sunday		Pass	Please give examples of specific week number to input

3.6.1.10				User must enter date when first Sunday of Advent will fall for that year	System accepts inputted date for First Sunday of Advent		Pass	Please give examples of specific Date to input
3.6.2	Read Event Determinant	Read Events	Display Event determinant form	User must have the view of the list of the records of Event Determinants	System displays list of the records for event determinants		Pass	
				User must click the view button of the specific record that he/she wants to view	System will re-direct user to the view page of the specific record he/she wishes to view and will have the complete view of the record		Pass	Where is the View button located? Please specify
3.6.3	Update Event Determinant	Update Events	Display Event determinant form	User must have the view of the Event determinant form	System will displays Event determinant page		Pass	
3.6.3.1				User must click the update button	System will re-direct user to the update page of the specific record that he/she wants to update		Pass	Please identify the location of the Update button

3.6.3.2			User must be in the update page of the specific record he/she wants to update	User must input the necessary changes for the field he/she wishes to update and must not leave any blank fields then user must click the update button	System will accept the changes made by the user and will redirect it to the view page of that specific record		Pass	
3.6.4	Delete Event determinant	Delete Events	User must be in the Event determinant form given that the user accidentally created a wrong record for event determinant	User must click on the delete button of the specific record that he/she wants to delete	System will show an alert message " Are you sure you want to delete this item?" and will let you choose "OK" - to delete the item or "CANCEL" to keep the item.		Pass	Please identify the location of theDelete button
3.6.4.1				User opt to choose "CANCEL"	System alert message will disappear		Pass	
3.6.4.2				User opt to choose "OK"	System will delete the record and will re-direct the user to the list of records of event determinant		Pass	
3.6.5	Read Solemnities or Feasts	Read Events	Display Solemnities or Feasts form	User must have the view of the list of the records of Solemnities of Feasts	System displays list of the records for Solemnities or Feasts		Pass	

3.6.5.1				User must click the view button of the specific record that he/she wants to view	System will re-direct user to the view page of the specific record he/she wishes to view and will have the complete view of the record		Pass	Where is the View button located? Please specify
3.6.6	Update Solemnities or Feasts	Update Events	Display Solemnities or Feasts form	User must have the view of the Solemnities or Feasts form	System will displays Solemnities or Feasts page		Pass	
3.6.6.1				User must click the update button	System will re-direct user to the update page of the specific record that he/she wants to update		Pass	Please identify the location of Update button
3.6.6.2			User must be in the update page of the specific record he/she wants to update given that all non-verse related must remain the same	User must input the necessary changes for the field he/she wishes to update then user must click the update button	System will accept the changes made by the user and will redirect it to the view page of that specific record		Pass	
3.6.7	Create Solemnities or Feasts		Display Solemnities or Feasts form	User must click the "Create Solemnities or Feasts" button on the upper-left hand corner of the page	System will re-direct user to Solemnities or Feasts create page with a Forbidden Error "You are not allowed to perform this action."		Pass	

3.6.8	Delete Solemnities or Feasts	Delete Events	User must be in the Solemnities or Feasts form	User must click on the delete button of the specific record that he/she wants to delete	System will show an alert message " Are you sure you want to delete this item?" and will let you choose "OK" - to delete the item or "CANCEL" to keep the item.		Pass	
3.6.8.1				User opt to choose "CANCEL"	System alert message will disappear		Pass	
3.6.8.2				User opt to choose "OK"	System will re-direct user to Solemnities or Feast delete page with a Forbidden Error "You are not allowed to perform this action."		Pass	
3.6.9	Read User	Read Events	Display User form	User must have the view of the list of the records of "User"	System displays list of the records for "User"		Pass	
3.6.9.1				User must click the view button of the specific record that he/she wants to view	System will re-direct user to the view page of the specific record he/she wishes to view and will have the complete view of the record		Pass	
3.6.10	Update User	Update Events	Display User form	User must click the update button	System will re-direct the user to the update page of the specific record with a Forbidden Error " You are not allowed to perform this action."		Pass	

3.6.11	Create User	Create Events	Display User form	User must click the "Create User" button on the upper-left hand corner of the page	System will re-direct user to User create page with a Forbidden Error "You are not allowed to perform this action."		Pass	
3.6.12	Delete User	Delete Events	User must be in the Userform	User must click on the delete button of the specific record that he/she wants to delete	System will show an alert message " Are you sure you want to delete this item?" and will let you choose "OK" - to delete the item or "CANCEL" to keep the item.		Pass	
3.6.12.1				User opt to choose "CANCEL"	System alert message will disappear		Pass	
3.6.12.2				User opt to choose "OK"	System will re-direct user to User delete page with a Forbidden Error "You are not allowed to perform this action."		Pass	
3.6.13	Read Weekday Reading	Read Events	Display Weekday Reading form	User must have the view of the list of the records of Weekday Reading	System displays list of the records for Weekday Reading		Pass	
3.6.13.1				User must click the view button of the specific record that he/she wants to view	System will re-direct user to the view page of the specific record he/she wishes to view and will have the complete view of the record		Pass	

3.6.14	Update Weekday Reading	Update Events	Display Weekday Reading form	User must have the view of the Weekday Reading form	System will displays Weekday Reading page		Pass	
3.6.14.1				User must click the update button	System will re-direct user to the update page of the specific record that he/she wants to update		Pass	
3.6.14.2			User must be in the update page of the specific record he/she wants to update given that all non-verse related must remain the same	User must input the necessary changes for the field he/she wishes to update then user must click the update button	System will accept the changes made by the user and will redirect it to the view page of that specific record		Pass	
3.6.15	Create Weekday Reading	Create Events	Display Weekday Reading form	User must click the "Create Weekday Reading" button on the upper-left hand corner of the page	System will re-direct user to Weekday Reading create page with a Forbidden Error "You are not allowed to perform this action."		Pass	
3.6.16	Delete Weekday Reading	Delete Events	User must be in the Weekday Reading form	User must click on the delete button of the specific record that he/she wants to delete	System will show an alert message " Are you sure you want to delete this item?" and will let you choose "OK" - to delete the item or "CANCEL" to keep the item.		Pass	

3.6.16.1				User opt to choose "CANCEL"	System alert message will disappear		Pass	
3.6.16.2				User opt to choose "OK"	System will re-direct user to Weekday Reading delete page with a Forbidden Error "You are not allowed to perform this action."		Pass	
3.6.17	Read Sunday Reading	Read Events	Display Sunday Reading form	User must have the view of the list of the records of Sunday Reading	System displays list of the records for Sunday Reading		Pass	
3.6.17.1				User must click the view button of the specific record that he/she wants to view	System will re-direct user to the view page of the specific record he/she wishes to view and will have the complete view of the record		Pass	
3.6.18	Update Sunday Reading	Update Events	Display Sunday Reading form	User must have the view of the Sunday Reading form	System will displays Sunday Reading page		Pass	
3.6.18.1				User must click the update button	System will re-direct user to the update page of the specific record that he/she wants to update		Pass	

3.6.18.2			User must be in the update page of the specific record he/she wants to update given that all non-verse related must remain the same	User must input the necessary changes for the field he/she wishes to update then user must click the update button	System will accept the changes made by the user and will redirect it to the view page of that specific record		Pass	
3.6.19	Create Sunday Reading	Create Events	Display Sunday Reading form	User must click the "Create Sunday Reading" button on the upper-left hand corner of the page	System will re-direct user to Sunday Reading create page with a Forbidden Error "You are not allowed to perform this action."		Pass	
3.6.20	Delete Sunday Reading	Delete Events	User must be in the Sunday Reading form	User must click on the delete button of the specific record that he/she wants to delete	System will show an alert message " Are you sure you want to delete this item?" and will let you choose "OK" - to delete the item or "CANCEL" to keep the item.		Pass	
3.6.20.1				User opt to choose "CANCEL"	System alert message will disappear		Pass	
3.6.20.2				User opt to choose "OK"	System will re-direct user to Sunday Reading delete page with a Forbidden Error "You are not allowed to perform this action."		Pass	

3.6.21	Read Event	Read Events	Display Event form	User must have the view of the list of the records of Event	System displays list of the records for Event		Pass	
3.6.21.1				User must click the view button of the specific record that he/she wants to view	System will re-direct user to the view page of the specific record he/she wishes to view and will have the complete view of the record		Pass	
3.6.22	Update Event	Update Events	Display Event form	User must have the view of the Event form	System will displays Event page		Pass	
3.6.22.1				User must click the update button	System will re-direct user to the update page of the specific record that he/she wants to update		Pass	
3.6.22.2			User must be in the update page of the specific record he/she wants to update given that all non-verse related must remain the same	User must input the necessary changes for the field he/she wishes to update then user must click the update button	System will accept the changes made by the user and will redirect it to the view page of that specific record		Pass	
3.6.23	Create Event	Create Events	Display Event form	User must click the "Create Event" button on the upper-left hand corner of the page	System will re-direct user to Event create page with a Forbidden Error "You are not allowed to perform this action."		Pass	

3.6.24	Delete Event	Delete Events	User must be in the Event form	User must click on the delete button of the specific record that he/she wants to delete	System will show an alert message " Are you sure you want to delete this item?" and will let you choose "OK" - to delete the item or "CANCEL" to keep the item.		Pass	
3.6.24.1				User opt to choose "CANCEL"	System alert message will disappear		Pass	
3.6.24.2				User opt to choose "OK"	System will re-direct user to Event delete page with a Forbidden Error "You are not allowed to perform this action."		Pass
